Please select what kind of key you want:

- (1) RSA and RSA
- (2) DSA and Elgamal
- (3) DSA (sign only)
- (4) RSA (sign only)
- (9) ECC (sign and encrypt) *default*
- (10) ECC (sign only)
- (14) Existing key from card

Your selection? 1

RSA keys may be between 1024 and 4096 bits long.

What keysize do you want? (3072) 4096

Requested keysize is 4096 bits

Please specify how long the key should be valid.

- 0 = key does not expire
- <n> = key expires in n days
- <n>w = key expires in n weeks
- <n>m = key expires in n months
- <n>y = key expires in n years

Key is valid for? (0) 1y

Key expires at Wed 13 Jan 2027 09:55:29 AM EST

Is this correct? (y/N) y

GnuPG needs to construct a user ID to identify your key.

Real name: Zan KV GPG

Email address: zankvgpg@test.test

Comment:

You selected this USER-ID:

"Zan KV GPG <zankvgpg@test.test>"

Change (N)ame, (C)omment, (E)mail or (O)kay/(Q)uit?

Change (N)ame, (C)omment, (E)mail or (O)kay/(Q)uit? 0

We need to generate a lot of random bytes. It is a good idea to perform
some other action (type on the keyboard, move the mouse, utilize the
disks) during the prime generation; this gives the random number
generator a better chance to gain enough entropy.
